EDUCATION

BS Software Engineering
COMSATS University Islamabad, Attock Campus, Pakistan
Currently pursuing undergraduate degree
Expected graduation: *[1 january 2029]*

FSc Pre-Engineering
[concotdia clg nowhera]

TECHNICAL SKILLS

AI & Automation
AI Agents, n8n Workflow Automation, AI Model Integration, Business Process Automation, API and Webhook Integration

Backend Development
Python, FastAPI, REST APIs, Authentication and Backend Logic

Frontend Development
React, JavaScript, HTML and CSS

Databases
SQL, Supabase, Oracle Database

Tools & Platforms
Git and GitHub, Postman, Swagger, Vercel, Google AI Studio

LANGUAGES

Urdu, English

CAREER INTERESTS

AI Automation Engineering, AI Agents, Backend Development, AI-Powered Applications, Workflow Automation, and API Integrations.

MUHAMMAD HAMMAD

FULL STACK AI AUTOMATION ENGINEER

BS Software Engineering Student | COMSATS University Islamabad, Attock Campus

PROFESSIONAL SUMMARY

Software Engineering student at COMSATS University Islamabad, Attock Campus, with practical experience in AI automation, workflow development, AI agents, backend development, and API integrations. Completed AI Automation Engineering training and internship at MetaKlouds. Experienced in building projects using Python, FastAPI, n8n, Supabase, SQL, and React. Interested in developing practical AI-powered applications and automation solutions for businesses.

PROFESSIONAL EXPERIENCE

AI Automation Engineer Intern | MetaKlouds | Internship
Dates: *[24 july -24 0ct 2026]*

- Built practical projects involving n8n workflow automation and AI agents.
- Worked with API integrations, webhooks, and automated business workflows.
- Developed automation solutions involving email processing and Google Sheets.
- Practiced workflow design, testing, troubleshooting, and backend development.
- Completed AI Automation Engineering training and received course completion and internship certificates.

PROJECTS

1. CampusResolve AI – *AI-Powered University Complaint Management System*
Live Demo: https://campus-resolve-complaint-ai.vercel.app/

- Developed a university complaint management platform.
- Designed role-based workflows for students, technicians, and administrators.
- Worked on AI-assisted complaint classification and workflow automation.

Technologies: Python, FastAPI, Supabase, React, AI Agents ,postman

2. AdmitCrew – *Agentic Study Abroad Management System*
Live Demo: https://agnetic-abroad-srudy-managment-syst.vercel.app/

- Developed an AI-powered study abroad consultancy system.
- Designed specialized AI-agent workflows for university research, document processing, and student follow-ups.
- Focused on automating admission-related business processes.

Technologies: Python, FastAPI, Supabase, n8n, AI Agents, React ,postman

3. AI Inventory Management System – *AI-Powered Inventory and Stock Management*
Live Demo: https://ai-inventory-for-a-shopping-mall-sy.vercel.app/

- Built an AI-assisted inventory management system for stock-related operations.
- Worked on chat-based inventory requests and stock management workflows.
- Designed role-based access for staff and managers.

Technologies: Python, FastAPI, Supabase, n8n, AI Agents ,postman

4. Clinic Appointment Management System
Live Demo: https://doctor-appointment-system-project.vercel.app/

- Developed a clinic appointment management application.
- Implemented role-based functionality for administrators, doctors, and patients.
- Worked on appointment-related workflows and backend functionality.

Technologies: Python, FastAPI, Supabase, React , n8n ,AI Agent ,postman

5. Event Registration and Management System
Live Demo: https://event-managment-system-project.vercel.app/

- Developed a web-based event registration and management application.
- Worked on registration workflows and event-related functionality.

Technologies: python ,FastAPI , supabase ,React,
